

Lake George East- Trails

On the East Side (Canaan) is a series of flat, wide trails that are perfect for casual walking. These trails are also groomed in the winter for cross-country skiing. Boxes at the trailhead contain maps. These trails are called the Alphabet Trails because each letter corresponds to an intersection. One option is to navigate the network via the ABCs, and on the return, just work your way back through the alphabet. Along the way, watch for the huge glacial erratic boulders near Intersection Q as well as fine groves of red pines near Intersection I and O.

Some trails are located on private property, so please respect a “leave no trace” philosophy.
