

LEGEND

SPECIAL FLOOD HAZARD AREAS (INDICATED BY 100-YEAR FLOOD)

- ZONE A** No base flood elevations determined.
- ZONE AE** Base flood elevations determined.
- ZONE AH** Flood depths of 1 to 3 feet (usually areas of ponds); base flood elevations determined.
- ZONE AD** Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain; average depths determined); for areas of alluvial fan flooding, velocities also determined.
- ZONE A99** To be protected from 100-year flood by regional flood protection system under construction; no base flood elevations determined.
- ZONE V** Coastal flood with velocity hazard (wave action); no base flood elevations determined.
- ZONE VE** Coastal flood with velocity hazard (wave action); base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

- ZONE X** Areas of 500-year flood; area of 100-year flood with average depth of more than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood.
- OTHER AREAS** Not determined to be outside 500-year flood plain.
- ZONE K** Areas in which flood hazards are under review.
- ZONE D** Areas in which flood hazards are under review.

UNDEVELOPED COASTAL BARRIERS*

- Identified 1983
- Identified 1991 or later
- Otherwise Protected Area

*Coastal barrier areas are normally located within or adjacent to special flood hazard areas.

NOTES

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all pluvial features outside Special Flood Hazard Areas. The community map repository should be consulted for possible updated flood hazard information prior to use of this map for property purchase or construction purposes.

Coastal base flood elevations apply only to landward of 80 NCHS, and include the effects of wave action; these elevations may also differ significantly from those developed by the National Weather Service for hurricane evacuation planning.

Areas of special flood hazard (100-year flood) include Zones A, AE, AH, AD, A99, V, and VE.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Floodway widths are provided in the Flood Insurance Study Report.

Elevation reference marks are described in the Flood Insurance Study Report. For additional maps, see separately printed Map Index.

MAP REVISIONS
 Town Office Building, Planning Department, 55 Water Street, Skowhegan, Maine 04976 (Maps available for reference only, not for distribution)
 INITIAL IDENTIFICATION: OCTOBER 18, 1974
 FLOOD HAZARD BOUNDARY MAP REVISIONS: JULY 1988 TO 1975

FLOOD INSURANCE RATE MAP EFFECTIVE: JANUARY 6, 1995

FLOOD INSURANCE RATE MAP REVISIONS: SEPTEMBER 20, 1995 (to change base flood elevations, special flood hazard areas and zone designations and to add base flood elevations).

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at (800) 628-6229.
