

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD
 (See base flood elevation determination.)

ZONE AE Base flood elevation determined.

ZONE AH Flood depths of 1 to 3 feet (usually areas of ponding); base flood elevations determined.

ZONE AO Flood depths of 3 to 7 feet (usually where flow on sloping terrain); average depth determined. For areas of abutment flooding, see base flood elevation determination.

ZONE A99 To be protected from 100-year flood by Federal flood protection system under construction; no base flood elevations determined.

ZONE V Coastal flood with velocity hazard (wave action); no base flood elevations determined.

ZONE VE Coastal flood with velocity hazard (wave action); base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

ZONE X Areas of 100-year flood areas of 100-year flood with average depth of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood.

OTHER AREAS

ZONE X Areas determined to be in the 100-year flood zone.

ZONE U Areas in which flood hazards are undetermined.

UNDEVELOPED COASTAL BARRIERS

Submerged 100' Dike
 Dike (100' or less)
 Dike (more than 100')

Coastal barrier areas are normally located within or adjacent to special flood hazard areas.

Floodway Boundary
 Floodway Boundary
 Zone D Boundary

Boundary: Dividing Special Flood Hazard Zones of Boundary, Building, or Area of Different Coastal Base Flood Elevations Within Special Flood Hazard Zones.

Base Flood Elevation Line: Elevation in feet

NOTES

This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all planimetric features outside Special Flood Hazard Areas. The community map preparator should consider other possible updated flood hazard information prior to use of this map for property purchase or construction purposes.

Coastal base flood elevations apply only to landward of 50 NAD 83, and include the effects of wave action; these elevations may also differ significantly from those developed by the National Weather Service for hurricane evacuation planning.

Areas of special flood hazard (100-year flood) include Zones A, AE, AH, AO, A99, V, and VE.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Floodway widths are provided in the Flood Insurance Study Report.

Elevation reference marks are described in the Flood Insurance Study Report. For adjoining map panels see separately printed Map Index.

MAP REPOSITORY
 Town Office Building, Planning Department, 80 Water Street, Skowhegan, Maine 04976. Maps available for reference only; not for distribution.

INITIAL IDENTIFICATION:
 OCTOBER 18, 1974

FLOOD HAZARD BOUNDARY MAP REVISIONS:
 OCTOBER 10, 1979

FLOOD INSURANCE RATE MAP EFFECTIVE:
 JANUARY 5, 1989

FLOOD INSURANCE RATE MAP REVISIONS:
 September 20, 1995: to change base flood elevations, special flood hazard areas and floodway designations and to add base flood elevations.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at (800) 538-6620.
